

SAFETY BARS & EQUIPMENT

THE SAFETY BARS ARE MADE OF MODULAR ELEMENTS THAT ARE MAINLY CONSTITUTED BY THE FOLLOWING PARTS:

- Rails made of extruded seamless nylon and reinforced with a aluminium core especially engineered for strenght.
- Moulded nylon bends.
- Mounting roses with steel core.
- Fixing roses.
- Straight wall supports made of nylon.
- Screws, nuts and inner parts all with anticorrosive coating.

RAIL

The rail is made of a seamless nylon tube reinforced with a high-strenght, rust proof aluminium core.

Nylon tube sizes:

Outer diameter: 1 7/16" (36)

Inner diameter: 1 3/16" (30)

Thickness: 1/8" (3)

Structural aluminium core sizes:

Outer diameter: 1 3/16" (30)

Inner diameter: 15/16" (23,6)

Thickness: 1/8" (3,2)
