temperature
control

Model #115.711.21.1
with internal temperature
control

Unique, touch-free design

• Geberit's Infrared Faucet incorporates contemporary design with state-of-the-art microelectronic technology. There is no need to touch any part of the infrared faucet. Water flow is provided when hand movement is detected by an infrared sensor under the spout.

Inexpensive installation and operation

• Geberit's Infrared Faucet runs on a small, six volt lithium battery. There is no electrical hook-up necessary – only a plumber is required for installation. Since all components are accessed from the top of the faucet body – installation, labor, and maintenance costs are further reduced.

Cost effective and dependable

• In the public sector where high frequency use is the norm, the Geberit Infrared Faucet quickly pays for itself. Its electronically controlled infrared optics adjust automatically for minimum energy consumption. You will save water, energy and money, while spending less time on facility maintenance. The battery is reliable for up to 200,000 hand washes (three years of use).

Geberit offers a variety of finishes to complement every bathroom decor

Advantages at a Glance

- *Hands-free operation
- *No electrical hook-up required
- *Self-adjusting infrared sensor
- *Available with external or internal temperature control
- *Crescent spout design
- *Access to all components from the top of the faucet body
- *Complies with ADA (Model # 115.711.21.1)
- *Vandal resistant
- *Five-year warranty

Available in six decorative Finishes

- *Brushed nickel
- *Polished nickel
- *Satin chrome
- *Chrome/PVD brass
- *Chrome
- *PVD brass

Includes:

- *Lithium battery (2CR5)
- *Filter and installation hardware
